and a speaker from the Emergency Committee for Political Prisoners (from Washington, DC)

"Resistance Conspiracy" is an exposé of the indictment against six political activists in the US. The DC 6, already imprisoned for actions against U.S. imperialism and in support of the Black liberation movement, are now charged with "conspiracy" to resist the government by "unlawful" means, in an attempt to lock them away forever. Come find out more about them, their situation, political prisoners in the USA, and the underground resistance to US Government policies.
